### EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Daniel R. McClure on May 21, 2007.

The application has been amended as follows:

In claims 8 and 18, change the equation " $v_{T,i} = v_{T,i} + \mu_{v,i} \tau_{e,i}$ "

in line 5 of claim 8 and line 5 of claim 18 to: ---  $v_{T,i} = v_{T,i-1} + \mu_{v,i} \tau_{e,i}$  ---

2. The following is an examiner's statement of reasons for allowance:

The following is a statement of reasons for the indication of allowable subject matter: The present invention comprises a timing error estimation apparatus for multi-carrier systems, comprising: a timing offset compensator for receiving a current symbol in a frequency domain after taking an N-point Discrete Fourier Transform (DFT) and compensating said current symbol for an effect of timing offset with a timing offset prediction value; and a timing error estimator coupled to said timing offset compensator to take a timing compensated version of said current symbol on pilot subcarrier locations, for calculating a timing error value based on a function of a phase tracking value, a channel response of each pilot subcarrier, transmitted data on each pilot subcarrier, and said timing compensated version of said current symbol on said pilot

subcarrier locations. There are many prior arts disclose a timing error estimation apparatus for multi-carrier systems, comprising a timing offset compensator for receiving a current symbol in a frequency domain after taking an N-point Discrete Fourier Transform (DFT) and compensating said current symbol for an effect of timing offset with a timing offset prediction value and a timing error estimator coupled to said timing offset compensator. However, those prior arts fail to teach a timing error estimator coupled to said timing offset compensator to take a timing compensated version of said current symbol on pilot subcarrier locations, for calculating a timing error value based on a function of a phase tracking value, a channel response of each pilot subcarrier, transmitted data on each pilot subcarrier, and said timing compensated version of said current symbol on said pilot subcarrier locations.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
